

# CREATIVE INFRATECH

| Your Partner in Structural Steel Success |

CREATIVE INFRATECH, specializes in manufacture, supply and providing services for all Components of PEB (Pre-Engineered Steel Buildings and Pre-Fabricated Steel Buildings. Our Products are custom designed to meet specific requirements of the customer to fulfill the need of modern Pre Fabricated Buildings Creative Infratech acts as a partner in your business and growth with a supply of all kinds of products and services to develop your business. .

Our team of experts is dedicated to ensuring that each product is manufactured with precision and efficiency, providing innovative solutions tailored to the unique challenges of your business. From initial consultation to final installation, we are committed to maintaining the highest standards of quality and customer satisfaction.

At Creative Infratech, we understand the importance of sustainability and eco-friendly practices in today's world. Our manufacturing processes are designed to minimize waste and reduce environmental impact, ensuring that our products not only meet but exceed industry standards.

Whether you're looking to construct a new facility, expand an existing one, or enhance your operations with state-of-the-art infrastructure, Creative Infratech is here to support your vision every step of the way. We pride ourselves on our ability to deliver projects on time and within budget, helping you achieve your business goals with confidence and ease.

Join us in building a future that balances innovation with responsibility, and let's create something extraordinary together.

## VISION

Our goal is to create reliable, high-quality products and solutions within the Precision Engineering Industry that boost the competitiveness of our clients and elevate the quality of life for individuals around the globe.

## VALUES

- Inclusion & Collaboration
- Learning, Development & Digitization
- Innovation, Communication & Transparency
- People-Centered, Customer-Focused & Growth-Oriented
- Pride & Ownership
- Engineering Excellence

## MISSION

We aim to deliver precision engineering and technical products and solutions that are responsive to our clients' needs, executed in an innovative, cost-effective, and professional manner while upholding the highest standards of quality.

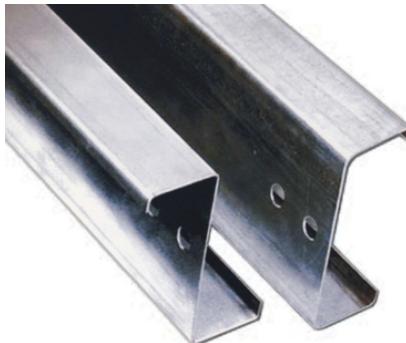

# OUR PRODUCTS

## PEB STRUCTURE COMPONENTS

### FRAMING STRUCTURE

- PURLINS & GIRTS

High-Quality Purlins Tailored to Your Needs. Our Purlins are available in the required sizes and lengths, featuring pre-punched holes for efficient bolting. We utilize an advanced production system that incorporates international standard cold-roll forming technology, leveraging high-tech machines equipped with online inspections for measuring, cutting, punching, and forming. This ensures precise dimensions, straightness, and an overall top-quality product.

They can be provided specifically according to client requirements and specifications.

- SECONDARY ACCESSORIES

We provide an extensive selection of **PEB Secondary Member Accessories** that are crafted with high quality and precision, ensuring that no issues arise during the assembly of structures at the site. These accessories are manufactured using raw materials sourced from reputable steel mills. Our offerings include:

- Anchor Bolts (Foundation Bolts)
- Sag Rods (Threaded Rods)
- Purlins Cleats
- Gusset Plates
- Diagonal Bracings
- Pipe Bracings
- Flange Bracings
- Angle Bracings
- Rack Angles
- Staircase Components

- FASTENERS

We offer an extensive selection of fasteners designed for Pre-Engineered Building (PEB) structures, suitable for both primary and secondary connections. Crafted from high-grade steel, these fasteners ensure superior quality and cost-effectiveness for your construction needs, with various Surface Treatments options such as Auto Black, Zinc Coating, Electroplating, Hot Dip Galvanizing, etc. Our fasteners can be tailored to meet specific client requirements and specifications in all sizes in various Grades like 4.6, 8.8 & 10.9 Grades.

Types of Fasteners We Provide-

1. Hex Bolts
2. Long Nuts (Cougliers)
3. Hill Side Washers
4. Chemical Fasteners
5. Mechanical Fasteners
6. Threaded Rods

## ROOFING AND CLADDING

### PROFILED SHEETS

- **HI-RIB PROFILE**

Our Profiled Sheets is a light weight wide span trapezoidal shaped roofing profile designed for economical application which gives aesthetical solution to all your needs. This profile is also available in tile form. Our fully automatic high speed MP-1020 roll forming line with hydraulic controls, offers superior product quality.

These Sheets are available in Other Options also, Detailed Below:

- **CRIMPED CURVED - HI RIB PROFILE**

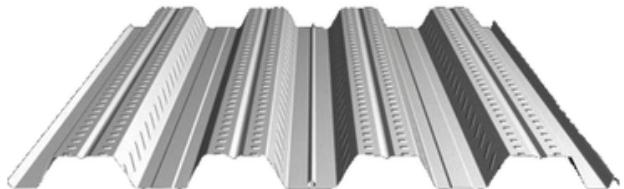

This profile is also available in concave as well as convex curved sheets to give architectural features to the building. The radius is as nominated by you down to minimum recommendation of 500mm

- **WAVE TILE PROFILE**

This Wave Tile Profile blends the classic look of architecture with modern material. This Metal roofing sheet has low maintenance cost, superior weather resistance and long life. It is ideally suited to commercial buildings, resorts, farm houses, hotels, residential houses and other public area residential use. It helps save money by reducing assembling time and workmanship by not breaking, cracking or leaking and being environment-friendly.

- **DECKING PROFILED SHEETS**

We offer a range of decking profile sheets in gauges varying from 0.8 to 1.25mm. All profiles are manufactured from steel strip to ASTM 653 / SS275 with guaranteed minimum yield strength of 350 N/mm<sup>2</sup> or as required by Client. Each Profile provides its own set of advantages to flexibly meet individual project requirements. They are Light Weight, Economical and Easy to Install.

- **PROFILED UV COATED POLY CARBONATE SHEETS**

We offer a rigid Polycarbonate transparent roof glazing sheet which is available in required length matching the Sheeting Profile made up of finest lexan polycarbonate sheets. These sheets offer light transmission between 50% - 90% depending on thickness. They also come as one side embossed thereby increasing the light transmission inside the shed. Their thickness range is between 1mm to 6 mm; However we usually recommend 2 mm thickness as the best match with the Metal Profile type sheets.

**In addition to the options mentioned above, we also provide the following sheets:**

- **Insulated Hi-Rib Profile Sheets**
- **Insulated Sandwich Panels (Puff Panels)**
- **Standing Seam Profiled Sheets**
- **Linear Profiled Sheets**

## ACCESSORIES

### TURBO VENTILATORS

Our Aluminum / Stainless Steel Turbo Ventilators is a natural air ventilation system. It is a free spinning roof exhaust, which works by utilizing the Velocity Energy of wind to induce air flow through Centrifugal Action.

These systems are manufactured using top quality Industrial Grade Aluminum / Stainless Steel and are renowned for their quality, performance and durability. Our Turbo Ventilators boast of a robust and dynamic design and rugged material of construction. They exhaust large volumes of hot air even at relatively low wind speeds and have the highest exhaust capacity in their class. They are capable of withstanding a high wind speed and are guaranteed against leakage of rain water. In addition, these are strong, impact resistant, light weight, effective, weather & storm proof, noiseless, maintenance free, easy to install, adaptable to any roof, economical to use & environment friendly. Our Turbo Ventilators were developed after extensive research. True to their name, these Ventilators are tough to the core and have a service life of more than 10 years in tough environments and in extreme weather conditions.

### RIDGE VENTILATORS

Our Ridge Vents are crafted from galvanized steel sheets. Depending on the necessary air changes, you can choose from individual Ridge Ventilators for each bay or opt for continuous Ridge Ventilators that span the entire length. A variety of ventilators are available with throat sizes ranging from 300 mm to 600 mm, complete with fixing accessories.

We provide a comprehensive range that aligns with the latest market trends and design aesthetics, enhancing the overall appearance of your building.

### INSULATIONS

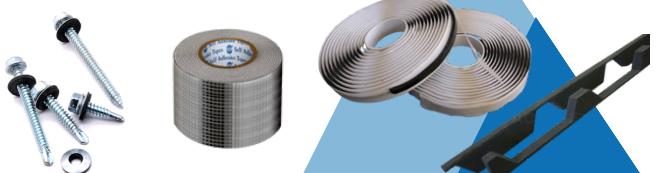

Insulation plays a vital role in Pre-Engineered Buildings (PEBs) as it contributes to thermal and acoustic comfort, energy efficiency, and overall building performance. The most frequently used insulation materials includes Bubble Wrap, XLPE, Fiberglass, Mineral Wool, etc. Each of these materials offers distinct advantages.

We provide an extensive range of insulation options, whether you need basic air bubble insulation or specialized rock wool insulation. Our offerings include:

- Air Bubble Insulation (Polynum Insulation)
- XLPE Insulation
- Glass Wool Insulation
- Rock Wool Insulation
- Cross Linked Polyethylene
- Polyurethane Foam

### SCREWS & ACCESSORIES

We provide a comprehensive selection of self-drilling screws and other accessories essential for the installation of your roofing and cladding sheets. Our offerings include:

- Self-Drilling Screws
- EPDM Washers
- Foam Fillers
- Butyl Adhesive Tape
- Silicone Sealants
- Silver Tapes
- Mastic Tapes
- Weld Mesh

All materials are sourced from a reputable manufacturer, ensuring adherence to quality standards.

# OUR PRODUCTS

- **RAIN WATER DOWNTAKE PIPE**

## METAL DOWNTAKE PIPE -

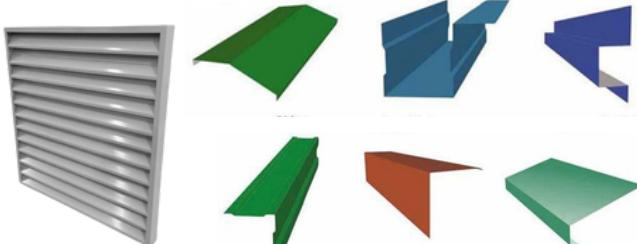

Our Downtake pipes offer a specialized solution for efficiently collecting and channeling rainwater from the roof. Crafted from high-quality pre-painted galvanized steel, sourced from reputable manufacturers, this advanced rainwater drainage system features machine-seamed construction for enhanced durability and a leak-free experience. Strategically positioned to gather rainwater from the roof's surface, they ensure maximum water conservation. Additionally, these pipes are easy to install, require minimal maintenance, and provide a sustainable option for rainwater drainage.

## PVC DOWNTAKE PIPE -

We offer comprehensive solutions for downtake pipe drainage systems, including all necessary fittings such as bends, jointers, Tee connectors, Y connectors, solvents, and more. Our products are available in all classes of ISI-approved, reputable brands, ensuring your drainage systems remain leak-free for an extended period.

- **TRIMS & FLASHINGS**

We provide a comprehensive selection of roofing and cladding flashings, manufactured from high-quality materials using hydraulic CNC machines to ensure excellent quality and finish. Our product range includes:

- Ridge Covers
- Cladding Trims and Flashings
- Eave and Valley Gutters
- GI Angles
- S-Type Louvers for Ventilation

All of our products can be customized to meet client requirements and designs.

- **STANDING SEAM ROOFING CLIPS**

We offer a exclusive selection of locking clips designed for standing seam roofing systems and screw-less roofing systems. These clips come in either sliding or fixed types, tailored to meet the specific needs of the end user. Manufactured from galvanized steel or Galvalume steel, our products utilize raw materials from a prime manufacturer to ensure durability and longevity.

Our Other Sheet Metal Products are below :  
(1) Outside Metal Closure

(2) Inside Metals Closure
